Harness clean and efficient energy with our cutting-edge solar energy systems. Optimize your business's energy consumption and reduce costs with advanced solar plant for agriculture solutions.

Solar shipping container powers irrigation and tools in off-grid farms. Ideal for remote agriculture needing clean, mobile energy.

The investment includes the establishment of a 1MW solar plant to power irrigation systems on a newly expanded 264-hectare section of the farm. ...

The event held recently was graced by Deputy Minister of Agriculture, Honourable Molebatsi Molebatsi as the guest speaker at Talana ...

This paper proposes a design methodology for a solar-powered pumping irrigation system, where a solar photovoltaic power generation system serves as the power source for the ...

The development of the solar-powered Smart Irri-Kit presents a sustainable and automated solution for optimizing irrigation practices, contributing to water conservation and improved crop ...

Our containerised energy storage system (BESS) is the perfect solution for large-scale energy storage projects. The energy storage containers can be used in ...

This study explores the design and adaptation of a shipping container into a portable irrigation control station for agricultural operations. The project leverages the structural durability and ...
