The Vermont State Police disseminates news releases for significant criminal or public safety incidents and arrests. These releases are not intended to document every public contact or ...

For HTTP URLs, a space in a path fragment part has to be encoded to `"%20"` (not, absolutely not `"+"`), while the `"+"` character in the path fragment part can be left unencoded.

Here `/g` is actually responsible for finding all matching characters. When I am sending this value to my Ajax

20-foot photovoltaic container for drilling sites

call, it traverses as normal spaces or simply %20 and thus gets rid of double-encoding.
