NetSure™ 700 Series with 400V DC Input 8V DC near the equipment loads. This lets you use existing 48V DC equipment loads while gaining the copper-saving benefit of 400V DC

Designed and manufactured in Switzerland, StratusPower's distributed topology, DARA, is designed to support very high availability with no single point of failure, ...

The rapid development of AI has imposed higher requirements for computing power on data centers. To accommodate more GPUs for computing, ...

An ±400V HVDC Power Rack is a modern power delivery and backup system designed to supply high-voltage direct current (HVDC) power at ...

Currently three companies have worked together to provide a high-level overview of the Diablo 400V architecture. The goal is to standardize items such as, high voltage connectors and ...

Highly efficient, modular, high-density 400kW (400/480V) 3-phase UPS that is ...

Skeleton's GrapheneBBU (Battery Backup Units) provide highly reliable and safe backup power for data centers, boasting 800 kW in a single cabinet, while meeting OCP T4 requirements.

Download our free guide to learn how the right edge infrastructure can give you a competitive advantage. 400V DC power is designed to ensure the highest levels ...

We carry a full line of factory-assembled UPS battery cabinets designed for data center UPS backup systems with pure lead agm batteries.

Tailored for energy wholesalers, system integrators, and commercial project developers, this 400V lithium-ion energy storage cabinet is a turnkey solution for peak shaving, load shifting, and ...
