Elektra's utility-scale solutions integrate advanced lithium-ion battery technology with liquid cooling, fire suppression, and intelligent monitoring systems to ensure safe, reliable operation.

The 2.5MW PCS and 5MWh batteries are all integrated into a single cabinet, allowing the system to output AC power directly. This saves space, enhances safety, and improves performance.

Liquid cooling techniques leverage the high specific heat and thermal conductivity of fluids (typically water-glycol mixes) to transfer heat away from battery cells at a much higher rate and...

The battery system is a containerized solution that integrates 10 racks of LFP batteries for the 4 MWh model and 12 racks of LFP batteries for the 5 MWh ...

LEOCH is proud to announce that our liquid-cooled 5MWh/2.5MW Integrated Battery Energy Storage System (BESS) has officially achieved UL ...

The system is built with long-life cycle lithium iron phosphate batteries, known for their high safety and durability, making it a reliable choice for renewable energy generation, voltage frequency regulation, ...

As the energy transition accelerates, our UL-listed 5MWh/2.5MW Integrated BESS stands ready to support the next generation of power infrastructure--with certified safety, robust ...

The 5MWh liquid-cooling energy storage system comprises cells, BMS, a 20"GP container, thermal management system, firefighting system, bus unit, power distribution unit, wiring harness, and more.

The 5MW/10MWh Immersion Liquid-Cooling ESS is a next-generation utility-scale energy storage solution that integrates cutting-edge safety and efficiency. By immersing the battery in thermally ...

5MW liquid-cooled energy storage battery system

The 5MWh battery system can adopt a 12-branch cluster design (418kWh per cluster), with a DC output voltage range of 1000-1500V. It is paired with a ...
