Overview
Antiquity Early Middle Ages Late Middle Ages 18th century 19th century 20th century 21st century
Wind power has been used as long as humans have put sails into the wind. Wind-powered machines used to grind grain and pump water -- the windmill and wind pump -- were developed in what is now Iran, Afghanistan, and Pakistan by the 9th century. Wind power was widely available and not confined to the banks of fast-flowing streams, or later, requiring sources of fuel. Wind-powered pumps drained the polders of the Netherlands

Through history, the use of wind power has waxed and waned, from the use of windmills in centuries past to high tech wind turbines on wind farms today, and ...
