Yes, you can expand your existing solar array with different-wattage panels, but you'll need to use specific equipment or configurations. The most effective approach involves installing ...

Wiring Solar Photovoltaic Panels in Series Wiring Solar Panels of Different Ratings in Series Wiring Solar PV Panels in Parallel Wiring Solar Panels of Different Ratings in Parallel Mixed Wiring of Solar Panels As we said above, when connecting solar panels in series, we get an increased wattage in combination with a higher voltage. Such "higher voltage" means that series connection is more often applied in grid-tied solar systems where: 1) the system voltage is often at least 24 volts, and 2) the solar array output voltage is fed to an inverter or charge ...
