“Energy storage isn't just backup power--it's a strategic asset for competitive operations.”

The need for long-duration energy storage, which helps to fill the longest gaps when wind and solar are not producing enough electricity to meet demand, is as clear as ever.

Energy storage using batteries is accepted as one of the most important and efficient ways of stabilising electricity networks and there are a variety of different battery chemistries that may be used.

With the P500E, you can transfer energy bi-directionally to the battery, grid and DG, helping you to achieve more functionality and maximise the benefits of your energy storage system.

You can install small-scale wind systems to supplement power for telecom cabinets, especially in areas with strong and consistent winds. Wind ...
