Discover how solar energy is being integrated into cargo ships to reduce fuel consumption, cut emissions, and pave the way for sustainable ...

The Maritime Technology Cooperation Centre (MTCC) Pacific supported the trial of marine solar power systems on two ships to power electricity needs, especially when in port. This resulted in overall ...

This case study explores a 100 kWp solar PV system installed on the hatch covers of a handymax bulk carrier. Operating primarily in Northern ...

Several critical factors must be considered when implementing photovoltaic panels on marine vessels, including access to the deck, solar radiation, economic benefits, and system ...

Wattlab has installed a PV system capable of delivering up to 35 kW to a cargo ship's high-voltage propulsion system, allowing it to temporarily ...

Easy to install PV systems are turning unused deck space into energy generators and cutting costs for cargo vessels.

Solar on ships in 2026 is finally getting less hand-wavy because there are now real installs and trials that show where PV helps and where it does not. The pattern that looks legitimate is solar ...

Dutch solar innovator Wattlab and German inland shipping giant HGK Shipping have teamed up to launch the world's first hybrid solar-powered inland ...

Tula is the first to incorporate high-grade solar power for its hotel load. Sometime in the future, it's also expected to transition to alternative fuels, ...
