A cornerstone of Algeria's solar ambitions is the Hassi R'Mel plant in northern Algeria. This innovative facility combines a conventional combined ...

Container homes have emerged as a revolutionary housing solution in Algeria, offering modern aesthetics, sustainability, and affordability. The demand for these structures is growing rapidly due to ...

The state-owned China State Construction Engineering Corporation (CSCEC) began building a 300 MW solar power plant in Algeria's Oued Province in March 2024 as part of the Solar 1,000 MW program.

The good news is that Algeria is also investing heavily in ...

Algeria is progressing with its strategy to diversify its energy sector, with a focus on a balanced mix of renewable energy, green hydrogen and traditional oil and gas development.

It expects to generate most of its renewable power through solar photovoltaic technology, with a capacity of around 14,000 megawatts, followed by wind energy at 5,000 megawatts.

This study presents an innovative approach to thermal modeling of a solar container house in Algeria using DesignBuilder, focusing on enhancing its energy performance through ...
