Yes, the sixth annual PV Module Index Report from RETC had some troubling findings, headlined by reports that spontaneous module glass ...

VDE Americas" David Devir looks at the origins of the supersized PV glass problem and considers how the industry can return to reliability.

A solar project developer engaged CEA to investigate widespread glass breakage across multiple PV sites. CEA conducted comprehensive on-site inspections and structural assessments, ...

The takeaway is that glass breakage isn't caused by one thing, it's caused by five or six things happening at once: a slightly bent module, slightly ...

Abstract The degradation of photovoltaic (PV) systems is one of the key factors to address in order to reduce the cost of the electricity produced by increasing the operational lifetime of PV ...

Meta description: Discover why photovoltaic panel glass detaches, backed by 2025 industry data. Learn about material failures, installation errors, and climate impacts - with actionable solutions for solar ...

In its annual PV Module Index, the Renewable Energy Test Center (RETC) examined emerging issues in solar glass manufacturing and field ...

In a feature article for PV Tech Power (Q3 2025), David Devir, principal engineer for VDE Americas, looks at the origins of today's supersized ...

Several changes have increased the risk of glass breakage. But there is probably no single change that is responsible for the problem. Here, we summarize our observations and thoughts on PV glass ...

Analysis of the causes of photovoltaic panel glass falling off

Impact due to hailstones, wind-blown debris, or even human-caused incidents like vandalism have been one of the common causes. Further, ...
