Batteries are gaining traction in the clean electrification pathway to decarbonization. Their global manufacturing capacity was forecast to grow from ...

Key Findings In 2025, battery energy stationary storage (BESS) installations surpassed 57 GWh/28 GW, a y-o-y increase of 29% (GWh). The utility-scale market underpinned growth with just ...

In this article, I'll walk you through all the important battery energy storage system statistics, where it started, how much it has grown, which ...

Annual battery storage installations hit 18 GW in 2023 globally US cumulative battery storage reached 15.4 GW by end-2023 China added 19.43 GW of battery storage in 2023 alone ...

The global energy storage market achieved substantial 43% year-on-year growth in 2025, with 106 GW of new capacity added worldwide. This ...

27.1 GWh of new battery capacity installed in 2025, marking the EU's 12th consecutive record year for battery storage deployment. 55% of all new capacity came from utility-scale systems, ...

The U.S. energy storage industry achieved a record-breaking milestone in 2025, installing 57.6 gigawatt-hours of new capacity--the largest single-year addition of battery storage on record. ...

Europe, Middle East and Africa (EMEA) represents 24% of annual energy storage deployments on a gigawatt basis by 2030. The region added ...

The US added 57 gigawatt-hours (GWh) of battery storage capacity to its electric grid last year - enough to supply the annual electricity needs of roughly five...
