Transformation of AES Galabovo into a large-scale energy storage facility using proven technology implemented in concentrated solar power plants (CSP) using molten salts

Sigenergy has deployed a 10 MW/20 MWh battery energy storage system (BESS) at a solar site in Malko Tarnovo, Bulgaria, using 240 kWh ...

The latest white paper, prepared by Fluence in collaboration with APSTE, examines the current state of the Bulgarian energy market and the potential for energy ...

The increased penetration of Renewable Energy Sources (RES) in the Bulgarian Power System (BPS) has dictated, the need for installing Energy Storage Systems (ES

storage is hindering Bulgaria in the development of an energy storage market. Furthermore, Bulgaria's energy legislation and grid codes have been historically written with thermal plants in mind, ...

SVOLT has successfully commissioned a 20MW/41.28MWh battery energy storage system in Burgas Province, Bulgaria, further strengthening its presence in the Eastern European energy ...

Around 500 MW of battery energy storage systems (BESS) with a storage capacity of some 1,300 MWh are now installed in Bulgaria and helping ...

Several large-scale solar photovoltaic (PV) projects and battery energy storage system (BESS) projects with a capacity exceeding 50 MW have ...

The tender was launched last year, aiming to significantly increase the share of renewable energy, mainly wind and solar, in the country's energy ...

Basic situation of bulgarian energy storage power station
