Proposed new rules seek to provide greater flexibility for developers of renewable energy projects with storage components.

As Colombia aims to generate 20% of its electricity from renewables by 2030, Medellin's lithium battery initiative emerges as a game-changer. This project doesn't just store energy--it ...

Energy storage is redefining what is possible for Colombia's grid. It is the key to balancing renewable growth with reliability, ensuring that clean energy is both abundant and ...

Mediante el uso de sistemas de baterías de iones de litio de alta capacidad, proporcionamos una infraestructura versátil y eficiente para almacenar ...

Conoce cómo funciona BESS en Termozipa, el sistema de almacenamiento con baterías que impulsa la transición energética y mejora la red de Enel ...

Colombia's Energy and Gas Regulatory Commission (CREG) has published a draft resolution establishing technical, commercial, and tariff conditions for battery energy ...

Colombia's first grid-scale battery energy storage system (BESS) came online in 2023 near Medellin - a 20MW/40MWh behemoth that's essentially a giant Tesla Powerwall for the ...

Celsia has deployed the battery energy storage system (BESS) at its 9.9MW Celsia Solar Palmira 2 farm in Valle del Cauca to ...

Located in the city of Barranquilla in northern Colombia, this project will consist of a 45 MWh lithium-ion battery energy storage system and is expected to reach commercial ...

Colombia's BESS tender in 2021, won by Canadian Solar, was a good step forward, but there is still no ...
