Discover all statistics and data on Solar photovoltaics in Brazil now on statista !

But recent and impending changes to the costs of imported panels and components cast a shadow over the outlook for Brazil's entire solar sector.

This format now accounts for almost 70% of solar energy in Brazil, and is the main driver of solar's growth in the country. Until recently, individual ...

In Brazil, solar photovoltaic dominates the distributed generation sector, representing 99% of the country's total distributed generation capacity. Small hydroelectric and wind account for ...

Just three years ago, Brazil did not feature among the world's top producers of solar energy, but by 2023 it had risen to sixth place in the rankings. The pace of growth has been notable: ...

The total installed solar power in Brazil was estimated at 53.9 GW at February 2025, which consists of about 21.9% of the country's electricity matrix. In 2023, Brazil was the 6th country in the world in terms of installed solar power capacity (37.4 GW). Brazil expects to have 1.2 million solar power generation systems in the year 2024. Solar energy has great potential in Brazil, with the country having one of the highest ...

This study analyzes the implications of key regulations (REN 482/2012, Law No. 14,300/2022, and REN 1059/2023) by applying methodologies from the Brazilian Energy Research ...

Solar energy in Brazil surpassed the 55 GW milestone in March 2025, more than doubling its photovoltaic (PV) count in the last few years. That breakneck ...

Planned green-hydrogen hubs along the Northeast coast could add 25-30 GW of additional photovoltaic demand, reinforcing Brazil's position as Latin America's largest solar producer.
