-----

Having launched a national storage strategy in 2023 that sets targets and aims to attract investment in the sector, and with a large pipeline of ...

The first two phases of Oasis de Atacama, the largest solar power and energy storage project in Latin America, have come on stream in Chile's ...

Chile has emerged as a world leader in hybrid systems and standalone energy storage since implementing its Renewable Energy Storage and Electromobility Act in 2022.

Hybrid renewable and battery storage projects are particularly important to providing more stable and lower carbon power supply in countries ...

Despite the high solar irradiance in a significant portion of Chile's territory, neither residential nor commercial and industrial PV installations are expected to grow significantly, which will limit the ...

By enabling the storage of solar energy for up to five hours, Andes Solar II-B provides firm power even after sunset, effectively addressing one of the key challenges of solar energy integration.

Atlas recently closed \$510 million in financing for its Estepa project in Chile, a hybrid system with an installed solar capacity of 215 MW and two ...

Global renewable energy firm Sonnedix has filed a new environmental impact statement (EIS) for its 150-MWp Tres Cruces solar project in Chile's Atacama region after redesigning an ...

Think of this 2,036 MWh battery like a massive, four-hour energy reservoir. It captures the solar energy "rain" during the ...
