China has just connected what it believes to be the world's biggest solar power plant to the grid in northwestern Xinjiang.

XINING, June 9 -- Amid China's green energy revolution, the world's largest solar photovoltaic power plant on the Qinghai-Xizang Plateau is forging a unique development path, ...

So there is a lot of uncertainty in the Chinese solar industry, but there are also irrefutable facts: China needs to continue to expand domestic ...

China's SDIC subsidiary commissioned a 1 GW photovoltaic plant on the Yalong River in Sichuan, making it the world's third-highest-altitude PV facility at 4,600 m. The project integrates with...

An aerial view shows residential buildings with roof-mounted photovoltaic-solar panels in Yinchuan, in China's Ningxia ...

Explore China's massive solar megaprojects. Learn how gigawatt-scale photovoltaic farms in remote regions are reshaping the global energy landscape.

China's largest single solar power project built on former coal mining subsidence land has begun operation in Lingwu, Ningxia Hui Autonomous Region. The 4-gigawatt photovoltaic plant ...

China is building an enormous network of clean energy industries on the Tibetan Plateau, the world's highest. The intention is to harness the region's ...
