From the air, the expressway resembles a winding dragon whose scales are made of photovoltaic panels. This project has used the ...

Chinese scientists have made a major breakthrough in TOPCon technology that sets a new power conversion efficiency (PCE) record of 26.66% for industrial-scale solar cells. The ...

China is building an enormous network of clean energy industries on the Tibetan Plateau, the world's highest. The intention is to ...

China is rapidly installing PV along highways, combining slopes, tunnels, and service areas to generate renewable electricity and ...

Perhaps more so than any other developed country, China is confronted with the effects of pollution and is therefore establishing vast ...

China's solar power generation overtook wind for the first time last year as a boom in cheap panels continues to reshape the country's grid and climate trajectory.

The tunnel runs through the Tianshan Mountains at an altitude of 9,842 feet (~ 3,000 meters) above sea level. Temperatures at ...

It is a zero-carbon demonstration project built to replace diesel generators for water pumping and irrigation, providing green electricity for irrigating over 3,100 hectares of ...

The Haitai Yangtze River Tunnel Clean Energy Power Supply Project will mainly focus on facilities such as onshore wind turbines, ...

From the world's longest tunnel carved through the "Heavenly Mountains" to sprawling desert solar farms and

China Solar Power Tunnel

secretive underground military strongholds, these mega-projects show the scale,...
