A 10-MWh sodium-ion battery energy storage station has been put into operation in Guangxi, southwest China, the country's first large-scale energy storage plant using sodium batteries.

On November 30, 2024, China Southern Power Grid successfully commissioned the first distributed sodium-ion battery energy storage system in the distribution network at No. 3 Gula Street, ...

China Southern Power Grid has implemented a diversified energy storage strategy, focusing on modern technologies and extensive infrastructure to enhance grid ...

China's installed capacity of new-type energy storage has officially surpassed 100 gigawatts, a critical milestone that fundamentally changes the economics and feasibility of integrating ...

On May 25, China's first large-scale lithium-sodium hybrid energy storage station -- the Baochi energy storage station developed by CSG -- was officially put into operation in Wenshan ...

In terms of storage types, the dominant advantage of lithium-ion batteries continues to expand, accounting for 97.4% of the new type storage installation. Other types, such as air compression, and ...

To foster and expand strategic emerging industries, China Southern Grid will accelerate the expansion and quality improvement of charging and battery-swapping infrastructure, strengthen ...

As renewable energy adoption surges, China Southern Power Grid has become a pivotal player in advancing energy storage solutions. This article breaks down the technical, economic, and policy ...

Nio Power, the power arm of Nio (NYSE: NIO), has signed a cooperation agreement with the energy storage arm of Chinese grid operator China Southern Power Grid to work together in areas including ...

China Southern Power Grid's energy storage exceeds standards

"China's advances in new-type energy storage are moving from isolated breakthroughs to a more systematic framework," said Rao Hong, chief scientist at China Southern Power Grid.
