Large-scale photovoltaic power plants in the United States often consist of two or more units which correspond to construction stages and/or technology ...

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

Frye Solar, located in Kress (Texas), is the largest solar project built by Repsol, with nearly one million panels, a total installed capacity of 637 MW ...

TotalEnergies is one of the top renewable energy players in the United States, with a portfolio of large-scale solar, storage, onsite B2B solar distributed ...

Here is a map of all utility-scale planned solar projects in United States. Hover over a planned solar project to view information on each project like their name, ...

In our latest Short-Term Energy Outlook (STEO), we expect that U.S. renewable capacity additions--especially solar--will continue to drive the growth of U.S. power generation over the next ...

FirmoGraphs is tracking more than 100 very large solar projects starting construction in 2023 with a total estimated value of nearly \$40 billion.

There are currently 366 utility-scale projects actively being built across the U.S. as of the most recent EIA data release. The average size of ...

Construction of solar power stations in the United States

Concentrating solar power (CSP) projects in United States are listed below alphabetical by project name. You can browse a project profile by clicking on the project name. You can also access ...
