OmniOn designs and manufactures power solutions for 5G, wireless, data center, and industrial applications that require quality, reliability, and efficiency.

From powering the building to powering individual racks, HARTING connectors enable a reliable chain of power throughout a data center. Eliminating hardwired (bolt-in) connections shortens the critical path. ...

We provide integrated products, services and solutions to help customers in the cement industry optimize their power and productivity resulting in increased availability and lower lifetime investment ...

The explosive growth of AI and its consequent hardware evolution have brought a dramatic increase in power levels of data center IT racks - up to several hundred kW already today.

Flex delivers advanced manufacturing, data center IT, and power infrastructure solutions from the grid to the chip, and product lifecycle services to address industry-wide challenges with power, heat, and scale.

Murata provides modular building blocks for HVDC-ready architectures, including front-end AC-DC modules, high-voltage DC-DC converters, point-of-load regulators, and integrated protection ...

The Diablo 400 specification defines a disaggregated power rack architecture that centralizes high-voltage conversion and delivers 400 V HVDC ...

From powering telecom towers to deploying fully integrated data center environments and intelligent cooling systems, we engineer the future of critical infrastructure.

Developing more efficient, sustainable power management solutions that meet the ever-changing needs of our world. We're solving critical power management challenges with innovative technologies that ...
