These retail prices were collected in June 2025 and include the cost of power, distribution and transmission, and all taxes and fees. Compare Dominican Republic with 150 other countries.

Overview Renewable energy resources Electricity supply and demand Access to electricity Service quality Responsibilities in the electricity sector History of the electricity sector Tariffs and subsidies As it has been described, most electricity generation in the Dominican Republic comes from thermal sources. Only 14% of the installed capacity is hydroelectric, with this percentage falling to below 9% when all the thermal self-generation is accounted for. The exploitation of other renewable resources (i.e. solar, wind) is very limited. However, this situation is expected to change following the enactment of in May 2007 of the Law of Incentives to Renewable Energy and Special Regimes (Law No. 57-07). Amon...
