A leading provider of industrial solar, battery storage, & power stabilization in East Africa; designing, installing, financing, and maintaining 60+ systems.

Our vision is to design, develop and manufacture world class LED Lights and innovative solar solutions by utilizing the available raw materials and transform ...

Running from July 2025 until December 2028 and supported by the Swiss Agency for Development and Cooperation (SDC), the project expands its geographical and thematic scope to deepen climate ...

Smart solar technology for homes, businesses & off-grid applications. Your one-stop destination for high-quality, affordable, and reliable solar energy products in ...

A new regional initiative is banking on solar energy to reshape agriculture and food systems across East Africa, with the aim of improving ...

The future growth trajectory will likely be characterized by increased adoption of intelligent, automated tracking control systems that leverage advancements in digital technologies.

This study aimed at developing a mobile solar-powered control system for real-time scheduling using feedback from soil moisture sensors. A smart solar-powered irrigation control ...

This paper is about the design of a lowcost system to monitor the weather and resulting PV generation for small-midsized microgrids in Africa. The setups are one 12kWp near-grid and 192-panel 76kWp ...

The overall level of solar penetration appears markedly higher, with 14 countries now exceeding the 25% threshold and 32 countries producing more than 10% of their electricity from solar, highlighting a ...

East Africa solar intelligent control system

Unlike conventional projects focused mainly on irrigation, SoLAR II will promote productive uses of renewable energy (PURE) such as solar-powered cold storage, dryers, milling and agro ...
