Discover safe, high-pressure hydrogen tanks (35MPa, 70MPa) for fuel cell vehicles and liquid hydrogen solutions for long-distance transport. Ensure efficient, reliable storage.

On-site hydrogen storage is used at central hydrogen production facilities, transport terminals, and end-use locations. Storage options today include insulated liquid ...

In connection with an electrolyzer system being built by HyAxiom, Inc. for a hydrogen production project on Jeju Island, KraftPowercon has been selected to supply a 5 MW-class rectifier ...

Our hydrogen containers offer a flexible and location-independent solution for energy supply. They are available in 20ft, 30ft and 40ft sizes and can be ...

Jeju Island is becoming an important testbed for industrial-scale hydrogen production in Korea, with renewable-heavy power conditions that can challenge large electrolysis loads. In that environment, ...

Currently, a single set of containerised hydrogen production equipment can reach a maximum capacity of 200m³ per hour. Hydrogen energy is considered the most ...

40-foot modular container that converts purified water into hydrogen through electrolysis. Hydrogen is compressed inside a 40-foot compression container for ...

Containerized hydrogen generators offer a disruptive solution. By producing hydrogen on-site in portable, scalable units housed inside shipping ...

Used globally in transportation, industrial processes and energy storage systems, hydrogen is emerging as a critical fossil fuel alternative to meet rising energy demands. With global demand for ...

Energy storage hydrogen production container
