The energy storage charging pile management system for EV is divided into three modules: energy storage charging pile equipment, cloud service platform, and mobile client.

Huawei ultra-fast integrated charging system consists of the power unit, liquid-cooled charging dispensers, Boost charging dispensers and energy storage cabinet (reserved).

Huawei Mobile Energy Storage Charging Pile The equipment structure of Huawei's energy storage charging pile integrates battery energy storage technology with traditional EV charging piles.

This syn-ergy of power sources, grids, loads, and energy storage will transform renew-able energy from supplementary to the primary energy sources capable of replacing fossil fuels.

Huawei charging pile with energy storage function The equipment structure of Huawei's energy storage charging pile integrates battery energy storage technology with traditional EV charging piles.

Huawei's R75020G2 charging module has an output power of 15KW, the module is a three-phase AC input, supports an input voltage of 260~470V, an output voltage range of 200~750V ...

The charging pile energy storage system can be divided into four parts: the distribution network device, the charging system, the battery charging station and the real-time monitoring system .

Energy Storage System Products List covers all Smart String ESS products, including LUNA2000, STS-6000K, JUPITER-9000K, Management System and other accessories product series.
