The project development objective is to increase access to clean and reliable electricity supply by reinforcing the transmission system capacity of the Eastern Ethiopia Electricity Grid.

Ethiopia has the third largest energy access deficit in Sub-Saharan Africa with about half the population still without access to reliable electricity. Over the past decade, the Government of ...

Any electricity company (utility) is responsible for maintaining safe and reliable electrical service to its customers. These issues are clearly stated in the following articles of the Electricity Operations ...

Unlike other energy commodities such as coal, oil and natural gas, electricity trade between countries is relatively limited as it is more technically complex and ...

Ethiopia has abundant resources that can generate 60,000 TWh electricity from hydroelectric, wind, solar and geothermal sources. The electrification process causes GDP growth and high public demand for 110 million of its population. On total, Ethiopia produces 14 TWh (14,000 GWh) from all facilities and exports other resources like natural gas or crude oil.

Workers undergo regular training on hazard identification, safety protocols, workplace procedures, and the proper use of safety equipment. Additionally, first ...

This document provides an introduction and summary of the Ethiopian Building Code Standard for Electrical Installation of Buildings. It discusses the authority ...

In this paper, the vulnerability assessment is performed using indices called active power performance index (PI_p) and voltage performance index (PI_v). These indices provide a direct means ...

The MoWIE and the EEA currently oversee two state-owned market players active in the electricity sector value chain, Ethiopia Electric Power (EEP) and Ethiopia Electric Utility (EEU).

Ethiopia electricity safety

This policy framework gives reassurance that Ethiopia is well placed to provide what modelling results suggest is necessary to meet both national targets and people's needs.
