A roundup of the past few weeks of BESS action in Europe, with projects moving forward in Romania, Denmark and the UK.

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy Storage ...

Explore 2025 BESS projects across Europe, from Germany's Na-ion advancements to France and Spain's renewable energy storage initiatives.

In 2025, Europe's battery storage market entered a new phase of scale and maturity. With 27.1 GWh of new capacity installed, the European Union achieved its 12th consecutive record ...

We consider three energy storage technologies, namely battery, pumped hydro, and hydrogen storage. We find that the cost-minimal energy storage mix in a country depends on the ...

Research institutions across Europe are developing next-generation storage technologies, including advanced flow batteries, compressed air energy ...

Discover all statistics and data on Energy storage in Europe now on statista !

We looked at all storage technologies apart from pumped hydro, identifying 1502 projects across 33 European countries with secured grid ...

This position paper, prepared by the Energy Storage Europe Association, assesses the system value of long-duration energy storage, identifies barriers to deployment, and proposes recommendations to ...
