-----

The flow-battery sector has met with a number of false dawns before. This time, developers and producers say, the technology is ready.

Ljubljana zinc-bromine flow energy storage battery plant is operational A comprehensive discussion of the recent advances in zinc-bromine rechargeable batteries with flow or non-flow electrolytes is ...

Also known as redox (reduction-oxidation) batteries, flow batteries are increasingly being used in LDES deployments due to their relatively lower levelized cost of ...

Upcoming Free FBE Webinar "Path to Bankability ...

Welcome to Ljubljana's New World Energy Storage initiative - a game-changer in urban sustainability. Nestled in Slovenia's capital, this project isn't just about batteries; it's rewriting the rules of how cities ...

This technology strategy assessment on flow batteries, released as part of the Long-Duration Storage Shot, contains the findings from the Storage Innovations (SI) 2030 strategic initiative.

SINTEF is central in pioneering advancements in chemistry and flow system designs to unlock the full potential of flow batteries, enabling them to meet our ...

Alessandro gained extensive experience in the electrochemical field, spanning lithium ion to flow battery design and testing. He also co-founded a start-up developing innovative metal-air flow battery. He ...

Long-duration energy storage solutions provider Sinergy Flow has closed a late-seed funding round, raising EUR 7 million (USD 8.25m) to expand its team and advance the development ...

Ljubljana's system relies on a hybrid setup of lithium-ion and vanadium redox flow batteries, balancing quick energy bursts with long-term storage. Think of it as pairing espresso shots ...
