-----

A German Architect has designed an innovative form of a solar power generator. Unlike being flat or thin like other PV panels, this one is a giant transparent sphere!

The glass sphere is used to concentrate diffused sunlight into a small surface of tiny solar panels. The ball lens is able to concentrate and diffuse light on one small focal point, which means ...

The glass sphere that concentrates solar and lunar energy is now seen as one of the most promising advances in solar energy. Actually, it "concentrates both sunlight and moonlight as ...

Like large lenses, the transparent liquid-filled glass spheres collect rays of light. Depending on the diameter of the sphere, fire point ...

the spherical glass solar energy generator uses the advantageous strategy of implementing a ball lens and specific ...

The betaray crystal sphere is a weatherproof glass ball which concentrates sunlight and moonlight into an intense beam that can generate electricity ...

Above the miniature array of solar cells is a large water-filled glass orb that works similarly to a magnifying glass in focusing the light ...

German architect Andr&#233; Broessel of Rawlemon has invented a solar energy system that uses a simple concept - a glass sphere that ...
