The solar farm infrastructure based on graphene-perovskite panels were successfully tested in an outdoor field on a Greek island.

SolarHub aims to strengthen the connections and scale-up 5 Greek and Turkish solar energy innovation ecosystems as a single, hybrid, cross-border, and interconnected Solar Energy Excellence Hub with ...

Projects 2023 A Greek-Turkish Solar Energy Excellence Hub to Advance European Green Deal (SolarHub)
Project Coordinator Prof. Dr. Derek BAKER

One of the critical challenges in integrating renewable power into Crete's grid, and indeed any country's grid, is addressing the intermittent nature ...

Solar energy innovation ecosystems are important. In this context, the EU-funded SolarHub project will strengthen connections between five Greek and Turkish solar energy innovation ecosystems.

The EU-funded project SolarHub aims to bridge research on solar energy technologies, such as solar PV and solar thermal, and industry to ...

Broad development of solar power in Greece started in the 2000s, with installations of photovoltaic systems skyrocketing from 2009 because of the appealing feed-in tariffs introduced and the ...
