Synthetic oils, also known as thermal oils, are engineered to have high boiling points and remain stable at high temperatures. They are primarily ...

The text discusses the use of thermal oil in solar thermal power plants, specifically in the first phase, for heat transfer and storage. Thermal oils are hydrocarbon-based liquids used as heat ...

Globaltherm ® Omnisol is a high performing low toxicity, low fire risk, heat transfer fluid for CSP applications operating up to 425°C (797°F). Globaltherm® Omnisol is suitable for use in parabolic ...

Our fluids are formulated to provide extra-long service life in high temperature systems. Caldera High Temperature Heat Transfer Fluids are thermally stable even in temperatures above 600°F and resist ...

Relatherm Thermal Fluids are used in solar power generation heat exchangers. They offer long lasting, trouble free operation, and a high bulk temperature.

The higher operating temperature significantly increases the overall efficiency of the power plant. The project partners demonstrated the functionality of the new silicone oil over a period of 15 ...

This paper presents a comparative study between various heat transfer fluids suitable for high temperature solar thermal systems. The comparison is made on the basis of equal heat transfer ...

The development of advanced HTFs holds great potential for improving high-temperature solar thermal systems" efficiency, reliability, and cost-effectiveness, facilitating the transition toward a ...

We offer efficient and reliable thermal fluid systems for the production of electricity in Concentrated Solar Power plants with thermal oil heaters.

High temperature thermal oil for solar power generation

Duratherm manufactures our high quality, clean running, non-toxic and non-fouling thermal oil to endure the punishing conditions of a wide range of commercial ...
