If you are getting smoke in the house or you stove just don't seem to be burning like should. Check the door seal and latch for a tight fit. Check the ash pan for shut tight and latched If all ...

From there the main to the house goes underground to the main house and comes up an exterior wall and actually above the ceiling into the attic space (under insulation but still meh). ...

The past few days, creosote is running down the outside of the pipe that is inside the house, between the ceiling and the stove. The exterior pipe looks fine. Also, this fall we had resealed ...

we are looking at buying a house that has a stone fireplace in the living room and a place in the basement to connect a woodstove, the house is 1456 sq ft on one floor and the basement is ...

The 500# tank is probably connected with a copper line with a fitting on the end to mate to the tank's nozzle. To use the 100# tank first compare the nozzle on it to the 500# tank and see if they ...

Hey guys, So I have a very small house in Western MA (main floor just under 900sq ft + walkout basement/built in garage which will not be heated, about 700sq ft of basement that will be ...

In the least, crack open a nearby window a 1/2" when burning. Is there a whole house ventilation system installed? If not, how does the house get its make-up air? PE Alderlea T6, Jotul ...

The house is fairly well insulated with good windows. It runs fairly stable around 60 on second floor. I run first floor at around 65. this is with temps in the teens at night and twenties ...

Cheaper than many wood stoves a furnace that can heat an entire house? What do you think? anybody have any experience using one or know of them in use? (broken link removed)

I will start by saying that I have never spent so much time and effort into something and still lack proper
