Photovoltaic energy experienced remarkable year-on-year growth of 37%, fuelled by the rapid integration of new infrastructure into the national grid. This ...

Portugal's solar energy sector is set to expand significantly by 2025, driven by strategic investments in solar farms and the green hydrogen market. ...

Portugal's solar capacity reached 6.17 GW in May, according to the country's renewable energy association. While distributed generation is steadily ...

These records confirm that Portugal has maintained a sustainable trajectory in the progressive integration of domestic renewable sources, while upholding the fundamental objectives ...

Renewable energy plays a big role in Portugal's energy sector. In 2023, the country's primary energy consumption stood at 0.95 exajoules, with ...

With record growth in capacity and generation, strong contributions to reducing fossil fuel use, and ambitious 2030 deployment targets, solar is central ...

Solar energy continues to play a critical role, supplying over 10% of Portugal's electricity. The country's focus on low-carbon sources like hydro and wind ...

This study aims to evaluate the future potential of solar photovoltaic energy (PV) production in Portugal by using high-resolution climate projections from CMIP6 scenarios (SSP2-4.5, SSP3-7.0, and SSP5 ...

APREN and INEGI have been working together to make this information accessible to anyone in order to answer these and other questions and make known the reality of renewable ...
