---

Under a 15-year agreement, renewable energy specialist Sunly designed, built, and now operates solar arrays ranging from 10 kW to 20 kW at sites across Estonia. Collectively, these parks ...

Estonia added 513 MW of new solar capacity in 2024, a record for a single year, according to Eesti Taastuvenergia Koda. The total significantly ...

This integrated project marks a significant milestone in Energy's strategic expansion in the Baltic energy markets, pairing renewable generation with advanced energy storage to unlock new ...

In 2022, Estonian solar power plants produced 2,569 gigawatt-hours (GWh) of renewable energy. 26 million euros were paid in subsidies for electricity produced via solar power in 2022.

Summary: This article explores how the Tartu Energy Storage Power Station addresses Estonia's renewable energy challenges. Discover cutting-edge battery technologies, regional energy trends, ...

This article explores the project's goals, technological innovations, and how it addresses grid stability challenges while supporting Estonia's 2030 green energy targets.

Estonia's installed renewable capacity in 2023 was dominated by solar photovoltaic, followed by onshore wind energy. The country plans to increase its renewable energy production by building offshore and ...

Estonia is launching a major 300 MW solar-plus-storage project in Ida-Viru County, transforming a former quarry to boost renewable energy and ...

The European Investment Bank (EIB), together with local commercial banks SEB and Luminor, is lending the Estonian renewable energy company Sunly EUR62 million to build and operate a ...
