Master station list - most climate variables in the datasets are from these stations. Where AWS stations have replaced the original stations, the records have been combined.

Now, most observations come from more than 220 automatic weather stations (AWS) in all corners of Aotearoa New Zealand, which provide ...

The weather forecasting service began in 1861, when a spate of shipwrecks prompted the Government to start a storm warning service as part of the then Marine Department. Forecasting remained a marine service until 1926, when it became part of the newly formed Department of Scientific and Industrial Research. In 1927 Edward Kidson was appointed Dominion Meteorologist by Earnest Marsden. At the time the New Zealand Meteorological Service was a very small institution wit...

There are more than 220 of these weather stations all across Aotearoa New Zealand. You can even set up your own at home if you're really into weather! Out at sea, weather buoys ...

Access nationally-significant weather data from approx. 6,500 climate stations which have been operating for various periods since the earliest recorded observations were made in the year 1850.
