---

Find up-to-date statistics and facts on the global solar photovoltaic industry.

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

In this article, we've focused on the titans of the industry -- the largest solar companies in the world -- and explored their crucial role in shaping the ...

Data and information about power plants and their location across the globe, plotted on an Interactive world map

Solar energy can be harnessed two primary ways: photovoltaics (PVs) are semiconductors that generate electricity directly from sunlight, while solar ...

Solar electric power generation created 17,212 jobs last year, which was a 5.4% increase, according to the latest data from the US Department of ...

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

In 2024, 40% of new PV was distributed, and 60% was utility scale.

The tracker further provides national totals for distributed solar capacities for 31 countries/areas. For more information about inclusion criteria, please see our Methodology page.
