Global Solar Power Plants There are currently 10,550 Solar power plants across the globe with a total capacity of 186242.0 MW.

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest ...

China has approximately 2,000 solar power stations, accounting for about 65% of the world's total solar capacity; 3. Rapid expansion has positioned ...

Find up-to-date statistics and facts on the global solar photovoltaic industry.

A global inventory of utility-scale solar photovoltaic generating units, produced by combining remote sensing imagery with machine learning, has identified 68,661 facilities -- an ...

Discover the world's largest solar farms in 2025. Complete rankings, capacity data, locations, and analysis of mega solar projects transforming global energy.

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development. The list is for ...

Welcome to the Global Solar Atlas. Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for ...

The tracker further provides national totals for distributed solar capacities for 31 countries/areas. For more information about inclusion criteria, please see our Methodology page.
