---

On December 14, 2018, MIU inaugurated a 1.1 million watt state-of-the-art solar power plant -- designed to provide one-third of the University's electric power. This "MEG"Array" Solar Power Plant is one of ...

Solar Farm 2.0 is a 54-acre, 12.32 megawatt (MWdc) solar array on the South Farms of the University of Illinois Urbana-Champaign.

Arizona State University has a comprehensive solar program responsible for over 53 MW dc equivalent solar generating capacity development from both on-site and off-site components. The ...

The 7.5-megawatt project is the largest urban ground-mount community solar array in the United States

This paper outlines the design, implementation, and performance of a 16 MWp Photovoltaic (PV) grid-connected system installed on 69 rooftop and 24 car park PV systems at The ...

The HSF was recently updated to include 720 410-watt panels. The panels are housed in front of King Hall and are surrounded by a local pollinator garden. CASE shares a small dedicated ...

I asked one of our PV designers at Solar , Matt Collins, to run a cursory solar analysis of the main campus features that appear to have solar -- ...

With an initial target of 500 kilowatts of installed solar capacity on campus, the new installations, along with those already in place, will bring the ...

Referred to as "Solar Farm 2.0," a new 54-acre, 12.32 megawatt (MWdc) utility-scale array is located on the University of Illinois Urbana-Champaign (UIUC) campus, north of Curtis Road, ...
