---

**BESS-365kWh Liquid-Cooled Energy Storage System** The BESS-365kWh provides a strong balance between capacity and space-saving design, making it a cost-effective solution for commercial and ...

It uses advanced liquid cooling technology to maintain optimal battery temperatures, ensuring high efficiency and longevity. The cabinet is designed ...

HyperCube is a liquid-cooling outdoor cabinet suitable for energy storage. It features high safety, a long lifespan, high efficiency, stability, scalability, and ...

Our system is designed to enhance energy density and thermal performance, accelerate installation times, engineered for optimal serviceability, and ...

Vericom energy storage cabinet adopts All-in-one design, integrated container, refrigeration system, battery module, PCS, fire protection, environmental ...

Each liquid-cooled cabinet houses five 314Ah battery modules, with each module consisting of 52 REPT 314Ah LiFePO4 cells in series, delivering 52.2kWh per ...

With a mere footprint of 1.3 square meters, the product features a modular design and high IP protection rating, allowing it to adapt to diverse application ...

It has a nominal capacity of 372.7 kWh with a floor space of just 1.69 square meters. The system is suitable for inverters with operating voltages ranging from ...

Compare that to standard 215kWh liquid-cooled units stretching to 2000mm length [5]. Why the difference? It's all about battery cell arrangement and cooling methods. Pro tip: Always ...
