---

May 15, 2025 A research team has unveiled a breakthrough in improving the performance of zinc-air batteries (ZABs), which are an important ...

Energy storage developer and subsidiary of Canadian Solar, Recurrent Energy, has sold its 200MWh Fort Duncan battery energy storage system (BESS) project, located in Texas, US, to developer Hunt ...

Columbia Engineering scientists are advancing renewable energy storage by developing cost-effective K-Na/S batteries that utilize common ...

Breakthroughs in battery technology are transforming the global energy landscape, fueling the transition to clean energy and reshaping ...

Global demand for energy storage is surging. Lithium-ion leads today, but new contenders like sodium-ion, flow, and gravity systems are ...

Discusses battery applications in EVs, renewable energy storage, and portable electronics, linking research to practical needs. This manuscript provides a comprehensive overview ...

But new battery technologies are being researched and developed to rival lithium-ion batteries in terms of efficiency, cost and sustainability. Many of ...

Ion Storage Systems is focused on developing the most energy dense, safest batteries that can be deployed in any environment. Breakthroughs ...

A new sodium-ion battery offers a cheaper and safer alternative to conventional lithium-ion systems, scientists say, paving the way for more ...
