Generator noise is a problem. While portable generators are great for providing emergency power, they can be loud and disruptive to those around you.

As critical components to transfer wind power into electric energy, drivetrains of wind turbines inevitably face challenges of higher vibration and noise. However, under the new situation ...

Since the wind within any given part of a city tends to change direction quickly, a wind turbine placed in an urban spot has to keep up with the ...

So certain wind generators are designed so that if the wind blows to the point where it would overspeed the generator, the blades flex, spilling wind, and generating a loud noise.

New bladeless wind turbine uses vibration instead of blades, offering quieter, safer, and greener energy for homes and cities.

L Huson & Associates Pty Ltd has been commissioned by the Voice for Walcha to peer review the Winterbourne Wind Farm Noise and Vibration Assessment (NVA), report reference ...

The noise of a wind turbine is a function of its distance and the surrounding environment. At a distance of 300 meters, a wind turbine puts out ...

Any one experience with the Rutland 1200 Wind Generator? I have fitted the anti vibration kit but the noise from the unit is pretty bad. Much louder than the old NVM unit we replaced. Bizarre. ...

I have an Aerogen 6 on a tripod mounting and always found that to me it was never too noisy (except in very strong winds). I had rubber mounted the bases of the tripod so that any ...

No noise pollution: One drawback of bladed turbines is the noise they make. However, this is not a problem

for the Vortex models as the ...
