Six new battery storage systems of varying capacities - from 20 to 50 MW each - have been connected by DTEK to the power grid in the Kyiv and Dnipropetrovsk regions. Collectively, they ...

Google has identified a potential battery overheating issue affecting certain Pixel 6a devices, following reports of overheating and two incidents of devices catching fire earlier this year.

DTEK secures a \$72M loan to build one of Eastern Europe's largest battery storage facilities, boosting Ukraine's energy resilience and independence.

That event showcased 23 battery storage solutions specifically designed for Eastern European climates. One standout was a cryogenic battery system maintaining 90% efficiency at -20°C - crucial for ...

In the midst of the soaring demand for EVs and renewable power and an explosion in battery development, one thing is certain: batteries will play a key role in the transition to renewable energy.

Our 1 GW project combines gas, solar, and battery storage to secure Kyiv's grid, cut emissions, and support critical services. Explore investment in this high-impact initiative.

Each site has a capacity between 20 and 50 megawatts, with almost seven hundred Fluence Gridstack battery units installed collectively. According ...

This paper provides an initial projection of future battery specific energy performance based on historical rates of progress and maximum specific energy limits for some select chemistries.

Despite the rapid decrease in battery prices and continued innovation, the degree of concentration in battery supply chains has raised ...

A Patriot air defense battery in Kyiv was reportedly destroyed this week following coordinated Russian strikes

Kiev battery performance

using Kinzhal hypersonic missiles and Iskander-M ballistic systems. This ...
