This article explores optimal locations, industry trends, and regulatory frameworks for building a Latvian energy storage power station, backed by data and case studies.

With Latvia's cumulative solar capacity reaching 920 MW by end of 2025, the Latvian Renewable Energy Alliance says the 1 GW threshold may now have been surpassed. The country ...

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of ...

In Latvia, developer Utilitas Wind announced the official opening of a 10MW/20MWh battery energy storage system (BESS) last week (1 November) ...

This article explores how this innovative project supports grid stability, integrates renewable energy, and positions Latvia as a leader in energy storage technology.

European Energy has secured EUR 37.9 million of long-term project financing for a hybrid solar and battery storage project in Saldus, Latvia. Once operational, it will be among the most ...

Latvia has taken a significant step towards a greener future with the commissioning of its first utility-scale battery energy storage system (BESS). The 10MW/20MWh BESS, located in Targale, Ventspils ...

This project is integrated with a 58.8 MW wind farm that has been in operation since 2022, adding a 10 MW / 20 MWh energy storage system to significantly enhance the wind farm's grid-connection ...

Estonian renewable power and heat producer Utilitas has inaugurated the first utility-scale battery energy storage system (BESS) in ...

The project, which cost EUR19.6 million, was delivered by energy solutions system integrator Diotech Group,

which won Eesti Energia's ...
