Energy storage systems are an essential element of Latvia's path towards a sustainable and energy-independent future. The importance of these ...

Work is currently underway on constructing a 50 MW/100 MWh battery energy storage system on-site. Lithuania-headquartered renewable energy company Green Genius has switched on ...

European Energy has announced the successful securing of EUR37.9 million in long-term project financing from Luminor Bank to develop a hybrid solar and battery energy storage project in ...

Green Genius is currently working to integrate the plant with a 50-MW/100-MWh battery energy storage system (BESS) to support the site's operations and help stabilise the grid. Green ...

Highjoule's PV-BESS-EV Charging System combines solar power, smart battery storage, and fast EV charging in one efficient solution. It reduces grid reliance, cuts energy costs, and enables clean driving.

After having completed the first divestiture of a 265 MWp PV solar plant with Latvian state-owned utility Latvenergo in Nov 2024, we have now ...

European Energy has agreed to sell a 50% stake in its Saldus solar and storage project in Latvia to Sampension, one of Denmark's largest pension funds. The Saldus project combines a ...

Summary: Latvia is rapidly advancing in renewable energy and energy storage to achieve energy independence and climate goals. This article explores the latest trends, government initiatives, and ...

This article explores optimal locations, industry trends, and regulatory frameworks for building a Latvian energy storage power station, backed by data and case studies.

European Energy sells 50% of its 111 MW Saldus solar and battery project in Latvia to Sampension, one of

Latvian solar power storage

Denmark's largest pension funds. The ...
