-----

The Accelerating Renewable Energy Investments and Sustainable Energy (ARISE) project was initiated with the objective of scaling-up solar PV in Maldives by encouraging private sector investments ...

The project, owned and operated by AES Distributed Energy, consists of a 28 MW solar photovoltaic (PV) and a 100 MWh five-hour duration energy storage system. AES designed the unique DC ...

Avi Technologies is a company dedicated for electrical engineering related services. Our main specialities are solar PV Systems, uninterruptible power supplies and other renewable energy services.

Moving from a fossil-based to a renewable-based energy model is the best way to make electricity cheaper for everyone, reduce the fiscal risks, ...

The Fari Islands in the Maldives are developing a mix of floating and ground-mounted solar installations expected to meet up to 50% of the ...

With over 1,200 islands and 99% sea coverage, the Maldives faces unique energy challenges. Outdoor inverters have become crucial for solar projects in this tropical paradise, where 98% of diesel imports ...

We have researched clean, feasible energy options and have come up with a portfolio of optimum energy solutions for the Maldives. We believe that a developed Maldives has to be a fossil fuel free ...

High-efficiency monocrystalline and polycrystalline solar panels. Reliable inverters for residential and commercial use. Energy storage solutions to ensure power availability. Desde Maldives is a leading ...

Afore inverters not only provide sustainable clean energy for the local area but also contribute to the zero-carbon goal.

The island nation is set to double its renewable energy capacity by 2025, with a strategic focus on solar
