-----

Outer Islands Solar Project Phase 2 @ Maloelap Communities 10/11/24-10/18/24 is to increase the share of renewable energy generation and enhance the reliability of electricity supply and improve ...

The Project, whose activities are grouped in three components, will fund renewable energy integration, distribution network and resilience enhancement upgrades, new hybrid mini grids, technical ...

Existing diesel power plants in Jaluit, Wotje, and Rongrong islands will be modernized by adding solar capabilities, significantly reducing fuel ...

Marshall islands solar container industrial park A 10-square-kilometer new energy storage industrial park is taking shape. Once fully operational, it can produce 56 GWh of lithium batteries and 22 GWh of ...

The Asian Development Bank is providing \$40.7 million for fixing MEC's fuel tank farm, support an energy security project to reduce power system losses, and implementing solar-to-grid.

In August 2016, Sunergise announced the launch of an innovative solar power generation plant designed to collect BOTH rainwater and solar energy for the ...

Under the National Energy Policy and to address the challenges associated with fossil fuel dependence, the Marshall Islands implemented its outer island solar project, setting a target of 100% renewable ...

The future of the Marshall Islands electricity system depends on upgrading the electricity network, getting better at energy efficiency, and replacing diesel ...

As of today, two atolls have successfully applied for and received grants for the installation of solar systems. Our dedicated team, in collaboration with our partners from MEC and NEO, are actively ...

In Arno Atoll, MEC will construct new hybrid systems combining solar and diesel power in both Arno and Ine
