The objective of the Sustainable Energy Development Project is to increase the share of renewable energy generation and enhance the reliability of electricity supply and improve energy efficiency in ...

This project introduces the pure solar energy system, focusing on replacing traditional diesel power generation to meet essential needs such as agriculture, ...

In August 2016, Sunergise announced the launch of an innovative solar power generation plant designed to collect BOTH rainwater and solar energy for the ...

The future of the Marshall Islands electricity system depends on upgrading the electricity network, getting better at energy efficiency, and replacing diesel ...

With \$12.5 million in funding, the second component will expand clean energy access across six neighboring islands. In Arno Atoll, MEC will construct new hybrid systems combining solar ...

A Solar PV grid stability study is currently being undertaken for increasing the uptake of solar energy in the four main on grid generations in Majuro, Kwajalein, Jaluit and Wojec.

\$12.5 million to build new hybrid systems combining solar and diesel power in both Arno and Ine islands. The project will also modernize existing diesel power ...

Under the National Energy Policy and to address the challenges associated with fossil fuel dependence, the Marshall Islands implemented its outer island solar project, setting a target of 100% renewable ...

After the project is completed, it can effectively increase the ratio of renewable energy consumption in the Marshall Islands, bringing the share of renewable ...
