A postdoctoral fellowship at KFUPM's IRC-SES focuses on advancing AC/DC microgrid technologies, EV integration, and sustainable energy systems. Candidates must have a recent PhD ...

The University of St. Thomas invites qualified candidates to apply for a Postdoctoral Scholar position at the Center for Microgrid Research. The position will support the Center's research

The Stanford Energy Postdoctoral Fellowship aims to identify, develop, and connect the next generation of energy leaders from science and engineering to policy and economics to address the challenges ...

Ensuring sustainable and resilient energy supply in such harsh environments requires advanced microgrid technologies. This project focuses on the design, development, and ...

This postdoctoral project aims to develop and deploy intelligent agrivoltaic production models, enhancing the sustainability and resilience of small and medium-sized farms amid energy and climate challenges.

This project focuses on the design, development, and demonstration of microgrids tailored for Arctic conditions. It is funded by Swedish Energy Agency, in close collaboration with Arjeplog Municipality ...

Postdoctoral in Power Systems and Microgrids: The Energy Institute of Louisiana is seeking a highly skilled Postdoctoral Researcher in Power Systems and Microgrids to support ...

Research Area: FPGA-based power electronics converters for microgrid or EV applications.

Highly motivated candidates with background in electrical power and with strong commitment to quality research in the areas matching the research interests of ...

The Fellow will also identify optimal sites for microgrid deployment, uncover community adoption drivers, and refine policy recommendations. The Social Science Fellow will lead energy ...
