This dataset contains timeseries for Rye Microgrid, Trondheim, Norway. The timeseries include solar and wind power generation, consumption and historical weather forecasts.

This paper builds on the existing research framework by combining PPO with machine learning-based load forecasting to produce an optimal ...

This strategy helps to enable One Grid Operation to meet energy demands with greater speed and agility by unlocking data, increasing visibility, and accelerating decision-making. Once the ...

The project will develop and pilot innovative solutions for coordinated automatic system control, dynamic transfer limits, and risk-based grid planning and operation--all aimed at significantly ...

Numerous studies in the literature focus on enhancing microgrid performance and efficiency by developing and applying diverse modeling techniques and optimization strategies to ...

When exploring the microgrid industry in Norway, several key considerations emerge. Norway's commitment to renewable energy, particularly hydropower, ...
