Moldova's telecommunications market features three main mobile operators: foreign-owned Orange and Moldcell, and state-owned Moldtelecom. The country also has several major ...

OverviewLandlineMobile telephonyInternetTelevisionPrinted mediaGeneral InformationExternal linksTelecommunications in Moldova are maintained at a relatively high performance level. Because Moldova is a small country, telecommunications companies managed to achieve good coverage in both wired and wireless communications infrastructure. Landline is available in most settlements, however mobile phone popularity has vastly increased in recent years. Mobile communications infrastructures are fairly well developed but suffer from high prices, nonetheless the amount of mobile subscriptions is growing ...

The Baicells Nova-243 eNodeB (eNB) is an outdoor LTE FDD/TDD base station with 2\*10W output power (2\*215;2 MIMO with 10W output each channel). The unit is compact, lightweight, ...

Manage it with an intuitive OAM platform as the Nova continues to optimize the network with SON technology. The Nova has been built to IP67 standards to ...

It's a great tool to track the deployment of new technology, monitor competitors and identify poor signal coverage areas. Compare the network coverage of mobile operators and check their performance at ...
