US Electricity Net Generation From Solar in All Sectors is at a current level of 27.96B, down from 31.50B last month and up from 20.54B one year ago. This is a change of -11.25% from ...

In 2024, net solar power generation in the United States reached its highest point yet at 218.5 terawatt hours of solar thermal and photovoltaic (PV) ...

Estimated small scale solar photovoltaic generation and small scale solar photovoltaic capacity are based on data from Form EIA-861M, Form EIA-861 and from estimation methods ...

2023 ATB data for utility-scale solar photovoltaics (PV) are shown above, with a Base Year of 2021. The Base Year estimates rely on modeled capital ...

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can find ...

Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. View an interactive map or download ...

GridInfo strives to provide a comprehensive database of power plant and utility net electricity generation across the United States. All data on our website is public ...

Lawrence Berkeley National Laboratory (Berkeley Lab) estimates hourly project-level generation data for utility-scale solar projects in the seven organized wholesale markets and 18 additional Balancing Areas.

The U.S. Solar Photovoltaic Database (USPVDB) provides the locations and array boundaries of U.S. front-of-the-meter, photovoltaic facilities, direct current ...

Tables 2.1-2.4 show the fuel makeup of generation capacity under construction, permitted, with an application

National solar power generation table

pending, or proposed. Solar comprises the largest share of all four development categories.
